

Press Release: 20th January 2010

ESTATE ENERGY
SOLUTIONS

BeGreen LowerLune teams up with Estate Energy Solutions

BeGreen LowerLune and Estate Energy Solutions are pleased to announce their partnership in order to promote home energy efficiency in the local community.

BeGreen LowerLune, currently based in the Victoria Institute, Caton, is a not-for-profit community initiative supported by Community Windpower Ltd to help the local community reduce carbon emissions and fight fuel poverty.

Estate Energy Solutions are locally based insulation experts who can help local residents save on money on their energy bills and reduce their carbon footprint.

BeGreen LowerLune are already working with Local and Effective Sustainable Solutions (LESS) to enhance the local community and through this new partnership visitors to the BeGreen LowerLune Energy Advice centre will now be able to arrange a free no obligation energy audit of their house in order to determine how to improve their energy efficiency and the options available.

Following an energy efficiency audit and using Estate Energy's wealth of knowledge, BeGreen LowerLune can help customers find grants and provide top up funding to allow the installation of various energy saving technologies including cavity wall insulation and loft insulation.

For more information, please contact BeGreen LowerLune on 01928 734544, or alternatively e-mail begreenlowerlune@communitywindpower.co.uk.
